

## Borrowing and Reading Library eBooks with your NOOK eReader

Download **Adobe Digital Editions** software for free onto your computer from <http://www.adobe.com/solutions/ebook/digital-editions/download.html>. Follow the on-screen instructions. The program should open once installation is complete. If you have problems, try a different browser (Firefox, Internet Explorer, Safari). *Please note: library computers do not have this software; you will need to put it on your own computer.*

Plug NOOK into your computer with the USB cable. You will be asked if you want to authorize your computer or not – **choose to authorize** – and you will be prompted through the process to create an Adobe Account and to log in.

Go to the library's Overdrive eBook website [bcsdmc.lib.overdrive.com](http://bcsdmc.lib.overdrive.com) and log in with your library card number and PIN. Select the eBook you want (a little black picture of a book means the book is available now; a little grey picture of a book means the book is checked out) and click **Borrow**. Click **Go to checkouts**. Click **Download** (select format). Select **EPUB eBooks** or select **PDF eBooks**; Kindle eBooks will not work with your NOOK.

Double-click on the saved eBook file to open it in Adobe Digital Editions. Then, drag and drop the eBook file into the MyNOOK/NOOK Color bookshelf (located in the left pane of the Adobe Digital Editions screen). Repeat this step for all the library eBooks you want to read on your NOOK (the library has a limit of 3 eBooks at a time). When you have finished loading eBooks, close Adobe Digital Editions, and safely eject the NOOK from your computer.

On your NOOK, in your library, tap **My Files**. Then tap the **Digital Editions** folder. Your library eBook should appear in the folder.

When you are ready to return the library eBook, right-click it in Adobe Digital Editions (on your computer) and select **return**.
